1398.4 is up to some homes in Wahpeton.

1399.1 for northwest shore of West

1398.5 for Triboji area

1398.6 for lowest area of EOB

1398.9 for Chalstrom Beach area

1399.3 East Lake Okoboji

Just a few spots I could think of with low banks. I don't know the exact level that the first dwelling would be affected. Would take a LONG time to scan around the entire lake and find it.

If you think of another low spot you want me to check, let me know.

Mike, what is the highest lower Gar elevation that will still has the lake waters in their banks? Does that make sense? I guess I want to know what is the lowest bank elevation on West, East, or the Lower Chain of Lakes? Do you know?

Mardi
